

CUSTOM BULK FILTRATION SYSTEMS —

Self-contained storage/filtration with customizable features

Improve your efficiency and avoid lengthy setup when it comes to storing and managing industrial lubricants, with this variety of self-contained lubrication storage and filtration units. Our self-contained solutions are great if you already have a room ready for lubrication storage & filtration, and systems are shipped piped and wired for quick installation and hook-up.

FEATURES

FILTRATION
Fluid cleanliness with in-line filtration and desiccant breathers.

SHOWN: 6 STEEL TANK SYSTEM - COLOR CODED

TANKS
Select the amount/material of tanks in the system, with color-coding options available. Choose from 30, 65, 120, or 240 gal. tanks arranged for your custom system.

POWER SOURCES
Choice of motor(s), with options for pneumatic/air.

SPILL CONTAINMENT
Attached pan for spills, with enough room for a drip container or spill pallets if desired (optional).

EASILY FILL/DRAIN FLUIDS
A choice of valves for easy dispensing and removing liquids from the tanks. Explore the selection of pumps that fit to valves on sturdy frame siding for easy filling.

SOLID CONSTRUCTION
Heavy-duty, modular design with integrated pallets, and the option for forklift pockets to easily maneuver. Ships pre-assembled.

BENEFITS

COST EFFECTIVE

Total compliant filtration/storage solutions without having to modify existing structures, pre-assembled and ready to use.

PLUG + PLAY

Units come pre-wired and pre-piped for minimal setup; you can filter and dispense clean lubrication mere hours after delivery.

EXAMPLE CONFIGURATIONS

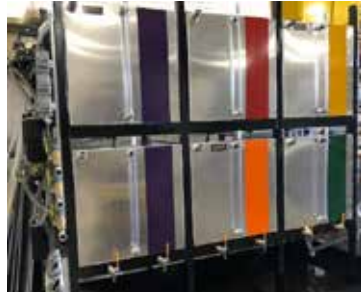

Featured systems show previously installed components and can be customized to desired specifications. Options include to build in-line with specifications similar to IFH systems.

ALTERNATIVE
ARRANGEMENTS

6 UNIT PLASTIC -
ELECTRIC PUMPS - HOSE REELS

6 UNIT STAINLESS STEEL -
COLOR CODING UNIT

LUBRICATION FILTRATION CABINET-
4 UNIT PLASTIC - AIR

8 UNIT PLASTIC - ELECTRIC PUMPS -
BEER TAP DISPENSING

ALL SYSTEM OPTIONS

TANKS

- » Aluminum, Plastic, Steel, Stainless Steel Tank Material Options
- » Color-Coding Options for Lube Excellence Available
- » Desiccant Breathers on each tank for Moisture Control
- » Sight Glass Options

LUBE FILTRATIONS

- » High Efficiency 10 Micron BETA 1000 Filters per tank
- » Individual pumps, discharge, suction hoses to avoid cross-contamination
- » Electric or Air/Pneumatic Pumps

EXTERIOR/ FRAME

- » Spill Containment Pan attached to frame
- » Heavy Duty Primer and/or Painted Frame
- » Forklift Pockets for easy maneuvering
- » Suction Wand Holders
- » Heavy Duty Spring-Close Spigot or 'Beer Tap' Valves

POWER

- » Breaker Box (Electric) or Air Connection (Pneumatic)

FULLY CUSTOMIZABLE

Units can be built into a variety amount of tanks (3,4,6,7,9 are common).
